

LETTER TO THE HOUSE

HOMELAND SECURITY COMMITTEE

Dear Honorable Representatives:

We, at PACTS, International, a non-profit 501 (c)(3) organization and members of our civilian Havana Syndrome community would like to thank you for your hearing held on May 8, 2024 entitled “Anomalous Health Incidents Targeting Americans in the Homeland” which was also re-broadcast on YouTube.

We are grateful that some of you specifically acknowledged that there were victims of AHIs that were non-governmental workers. Yes, there absolutely are! If this weaponry exists and is operating covertly, why would its use be limited to only US government personnel?

There are tens of thousands of us nationwide and perhaps hundreds of thousands of us worldwide in our Internet community. The world’s most well-kept secret is that essentially all developed countries and even most developing countries have access to directed energy weapons (DEWs) and are using them domestically to control their populations. These devices have been marketed worldwide and are an easy sell to most governments that seek covert dominance of their citizenry.

We applaud your continued efforts to discover the truth about those operating the devices that cause the AHIs which have been determined by the National Academy of Sciences to be microwave or RF weapons.

Because microwaves have the ability to pass through walls, perpetrators can remain hidden behind homes, offices, parked vehicles and other platforms, while committing heinous atrocities upon their victims, leaving them to suffer intensely and appear delusional as they complain of serious injuries to their brain and/or body by attackers who are unseen and unknown.

For the perpetrators, this may have seemed like the perfect crime - and so it has for several decades, until recently when their methods are now starting to be revealed.

As victims, we need the possession and use of DEWs and microwave weapons to be criminalized nationwide to enable law enforcement agencies to investigate, apprehend, and prosecute those individuals who are covertly operating these life-threatening devices in our nation.

The witnesses that you brought before you at your recent hearing were correct that the intelligence agencies know a lot more than they are saying. Therefore, we recommend an investigative team that is independent of the Intelligence Community (IC) oversight since the IC is more heavily invested in the problem than in obtaining a solution.

We look forward to your continuing efforts on behalf of all victims and would be more than glad to assist you in organizing future hearings on this topic.

Thank you in advance for your reply.
